Sales of semiconductor products, semiconductor-related products and software, and Technical support services for design and development of electric equipments.

2 . The Purpose of Obtaining ISMS

PALTEK has emphasized the importance of Information Security in every aspect of business conducts as one of the most important responsibilities by setting clear “Privacy Policy” and taking various technical measures. To further improve security of such important information, PALTEK formed ISMS project in May 2004, which especially aim at securing such confidential and personal information offered from our customers, suppliers and investors..

We started the project by closely analyzing potential risks regarding information security within the company, and based on such analysis, we established company-wide security rules. In September of 2004, PALTEK Security Policy was newly established and all the employees went through the training program on the new Policy and rules. Through these activities, PALTEK was successfully certified and obtained ISMS Certificate in December, 2004.

All the employees and officers at PALTEK will continue to meet ISMS certification standard and make efforts to further improve information security management.
