### 4. Reason for Revision

The Company group recognizes profit returns to all shareholders as one of the important business issues. For this reason, while striving to improve performance and business efficiency, and continually maintaining profitability, we have a basic policy of providing fair profit allocation, with consideration given to enhancement of our management base and future business evolution. Regarding dividends, we will determine dividend amounts after taking into account payout ratios for performance, while maintaining the steady dividends that we have offered up until now.

Regarding dividend payouts for FY2010, we initially announced the plan of 5 yen per share. However, we would like to increase by 2 yen per share and the total of 7 yen per share in consideration of the better income results of FY2010, overall financial status of the Company and dividend payout share to the total income.

The above revised guidance will be submitted for approval to the 29<sup>th</sup> Annual General Meeting of Shareholders, which is scheduled in March, 2011.
